Automation

Behat feature (insideatf.feature)

```
Feature: Inside ATF
  Verify an annonymous users does not have access to...

  Scenario: Verify private file is not available
    Given I am on "/inside-atf/docs/insideatf-july2017pdf"
    Then I should see "Access denied"
    Given I am on "/inside-atf/docs/insideatf-july2017pdf/download"
    Then I should see "Access denied"

  Scenario: Inside ATF Login is working
    Given I am on "/resource-center/inside-atf"
    Then I should see "Protected Page -- Enter password"
    Given for "edit-password" I enter "XXXXXXXX"
    When I press the "edit-submit" button
    Then I should see "Inside ATF | Bureau of Alcohol, Tobacco, Firearms and Explosives"
```

Execute behat test

```
> bin/behat features/insideatf.feature
```

RESULTS:

```
3 scenarios (3 passed)
9 steps (9 passed)
```
